A Proof that $3 +_{\mathrm{s}} (2 +_{\mathrm{s}} 1) \Downarrow 6$

$$
\dfrac{\dfrac{}{3 \Downarrow 3}\,\textit{(B-NUM)} \qquad \dfrac{\dfrac{}{2 \Downarrow 2}\,\textit{(B-NUM)} \quad \dfrac{}{1 \Downarrow 1}\,\textit{(B-NUM)}}{2 +_{\mathrm{s}} 1 \Downarrow 3}\,\textit{(B-ADD)}}{3 +_{\mathrm{s}} (2 +_{\mathrm{s}} 1) \Downarrow 6}\,\textit{(B-ADD)}
$$

This is the derivation tree of $3 +_{\mathrm{s}} (2 +_{\mathrm{s}} 1) \Downarrow 6$.

As you see, the derivation tree requires the rule (B-NUM) *at the leaves.*
